

Java Programming

Assignment 5

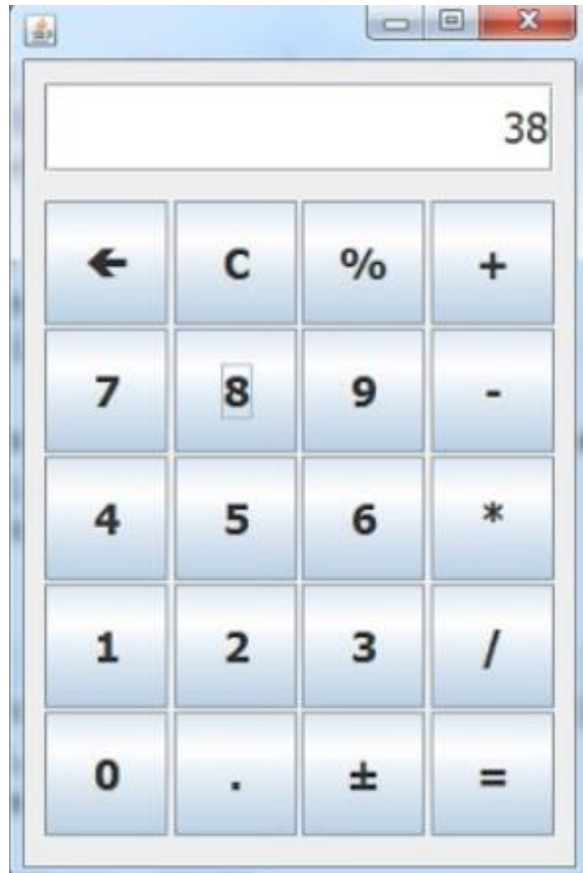

Task

- Create simple GUI calculator.
- Include operations `add(+)`, `subtract(-)`, `multiply(*)`, `divide(/)`.
- Use only simple elements (label, input text, button etc.)
- Limit input numbers to have no more than 5 digits (Output warning on a console if larger)

For bonus points (1-2)

- Extend the program to have `mod(%)`, `square(^2)` and `root($\sqrt{}$)` operations
- Add clear/reset button or additional functionality
